NOOTEBOOM PARTS

PARTS **THAT GETS YOU THERE**

Nootboom Trailers mainly uses original parts such as SAF, BPW, Wabco, Weweler, Jost, Groeneveld and (of course) Nootboom. This gives you, the transport operator, the best possible guarantee against malfunctions. Nootboom has comprehensive documentation on file and can give you specific, tailor-made advice regardless of the year your trailer was manufactured. A sophisticated stock-control system makes it possible to supply these parts from stock. Nootboom has around 4000 items in stock at their logistics centre in Wijchen.

In this magazine you can see a selection of our extensive product range. Nootboom delivers their parts throughout Europe and delivery within 24 hours is available in most places. A network of 60 service organisations and a distribution centre in France and Germany provide the support. More parts can be found online at www.nootboomparts.com

We get you there.

**HIGH QUALITY
STANDARD**

HIGH QUALITY STANDARD

Nooteboom never compromises on quality, that's why we only use top-quality materials and certified components made by A-brands such as BPW, SAF, Michelin, Jost, Wabco, Hella and Groeneveld. Nooteboom trailers are the most reliable with an extremely advantageous price/quality ratio. And what's more, Nooteboom vehicles have a very high residual value.

CONSERVATION

After the construction phase the entire chassis is blasted, followed by thermal spraying. Then a flexible primer is sprayed onto the chassis in two separate layers and finished with a 2K top coat in a colour chosen by the customer. At that point, and not before, the various components are installed.

PARTS

Nooteboom has been using original parts for many years and details of all vehicles are kept on file. At our logistics centre in Wijchen we have over 4000 articles in stock. All parts can be distributed worldwide and in most places within Europe we can deliver in 24 hours.

SERVICE

The professional team of Nooteboom Trailer Service will be happy to give you advice about preventive maintenance, maintenance intervals and accessories. In this way we help you to prevent unexpected and expensive (both in money and time) malfunctions and down-time. Throughout Europe Nooteboom has a network of specialist service centres, mobile service units and authorized service partners.
